During this period, Southridge began to focus on developing innovative programs and curriculum that would not only help students continue to thrive academically, but that would develop well-rounded graduates with the skills, knowledge, character, and confidence to realize their full potential, and make a difference in the world.

Mr. Jones encouraged students to think of themselves as global citizens, and he helped to develop and expand initiatives such as the Student Exchange Program and Service Trips. The Athletic and Arts programs continued to grow and thrive.

During the 2019-2020 school year, as Southridge celebrated its 25th year, the school entered a new era of its story. With the building debt paid off, thanks to the community's support of the Legacy Campaign, a plan for campus development in place, and a commitment to preserving the qualities of the school that have always made it strong, Southridge was poised to dream big and imagine limitless possibilities – for the school and most importantly, for students.
